Subject Index

Adenovirus, bronchopneumonia in an immunocompetent adult, 325(5): 285–287

Adrenal failure, primary antiphospholipid syndrome and, 325(1):41–44

Adverse drug effects
- drug-induced renal failure: update on new medications and unique mechanisms of nephrotoxicity, 325(6): 349–362
- glucocorticoid-induced osteoporosis in patients with sarcoidosis, 325(1): 1–6
- heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1):45–47
- hepatitis associated with amoxicillin/clavulanic acid and/or ciprofloxacin, 325(1):31–33
- terbinafine-associated hepatotoxicity, 325(5):292–295

African Americans
- potential role of increased iron stores in diabetes, 325(6):332–339
- racism and cardiovascular disease in, 325(6):315–331
- from 1960s Evans County Georgia to present-day Jackson, Mississippi: exploration of the evolution of cardiovascular disease in African Americans, 325(6):307–314
- traditional and nontraditional risk factors for cardiovascular and renal disease in (part 2), 325(6):305–306

Anemia, cardiac performance and morphology in end-stage renal disease, 325(4):168–178

Ankylosing spondylitis, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92

Anti-cardiolipin antibody, thrombosis and infection: case of transient anti-cardiolipin antibody associated with pylephlebitis, 325(6):365–368

Antiglomerular basement membrane glomerulonephritis, granulocyte and monocyte adsorption apheresis in a patient with active ulcerative colitis and, 325(5):296–298

Antimicrobial therapy
- evaluation and treatment of acute bronchitis at an academic teaching clinic, 325(1):7–9 (erratum, 325(5): 303)
- hepatitis associated with amoxicillin/clavulanic acid and/or ciprofloxacin, 325(1):31–33

Antioxidant vitamins, and coronary heart disease: part II. randomized clinical trials, 325(1):15–19

Antiphospholipid syndrome, associated with acute adrenal failure, 325(1):41–44

Aortic valve, valvular and perivalvular abnormalities in end-stage renal disease, 325(4):237–242

APACHE II, abdominal computed tomography prolongs length of stay and is frequently unnecessary in evaluation of acute pancreatitis, 325(5); 251–255

Arthritis, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92

Atrial septal defect, complicated by right-sided endocarditis, 325(5): 282–284

***Bacteroides* bacteremia,** thrombosis and infection: case of transient anti-cardiolipin antibody associated with pylephlebitis, 325(6):365–368

Balthazar score, abdominal computed tomography prolongs length of stay and is frequently unnecessary in evaluation of acute pancreatitis, 325(5);251–255

Blood pressure
- cardiac performance and morphology in end-stage renal disease, 325(4): 168–178
- hypertension after kidney transplantation, 325(4):202–208
- hypertension in chronic dialysis patients, 325(4):194–201
- midodrine improves chronic hypotension in hemodialysis patients, 325(5):256–261
- risk factors for coronary artery disease in patients with renal failure, 325(4):209–213

Bone mineral density, glucocorticoid-induced osteoporosis in patients with sarcoidosis, 325(1):1–6

Breast cancer, role of DNA testing in, 325(3):120–124

Bronchitis, evaluation and treatment of acute bronchitis at an academic teaching clinic, 325(1):7–9 (erratum, 325(5): 303)

Cardiology Grand Rounds from The University of North Carolina at Chapel Hill, antioxidant vitamins and coronary heart disease: part II. randomized clinical trials, 325(1): 15–19

Cardiovascular health and disease
- antioxidant vitamins and coronary heart disease: part II. randomized clinical trials, 325(1):15–19
- cardiac performance and morphology in end-stage renal disease, 325(4): 168–178
- cardiovascular complications of end-stage renal disease: overview, 325(4):161–162
- cardiovascular mortality in end-stage renal disease, 325(4):163–167
- congestive heart failure in patients with chronic kidney disease and on dialysis, 325(4):179–193
- diagnosis and therapy of coronary artery disease in renal failure, end-stage renal disease, and renal transplant populations, 325(4): 214–227
- 50-year-old man with chest pain, 325(2): 70–74
- glomerular and tubular dysfunction in children with congenital cyanotic heart disease: effect of palliative surgery, 325(3):110–114
- hypertension after kidney transplantation, 325(4):202–208
- hypertension in chronic dialysis patients, 325(4):194–201
- metastatic melanoma presenting as cardiac mass and hemobilia, 325(3): 157–159
- pericardial involvement in end-stage renal disease, 325(4):228–236
- pericardial tamponade-associated hyponatremia, 325(1):51–52
- racism and cardiovascular disease in African Americans, 325(6):315–331
- right-sided endocarditis complicating an atrial septal defect, 325(5):282–284
- risk factors for coronary artery disease in patients with renal failure, 325(4):209–213
- from 1960s Evans County Georgia to present-day Jackson, Mississippi: exploration of the evolution of cardiovascular disease in African Americans, 325(6):307–314
- traditional and nontraditional risk factors for cardiovascular and renal disease in African Americans (part 2), 325(6):305–306
- valvular and perivalvular abnormalities in end-stage renal disease, 325(4): 237–242
- vascular and cardiac infections in end-stage renal disease, 325(4):243–250

Case records of the VA Maryland Healthcare System/University of Maryland Medicine, 50-year-old man with chest pain, 325(2): 70–74

Chest pain, in 50-year-old man, 325(2): 70–74

Churg-Strauss syndrome, diagnostic difficulties and pathogenesis, 325(2):101–105

Cimino-Brescia fistula, isometric exercise increases the size of forearm veins in patients with chronic renal failure, 325(3):115–119
Cirrhosis, extrahepatic manifestations of hepatitis C infection, 325(3):135–148
Clinical trials, antioxidant vitamins and coronary heart disease, 325(1): 15–19
Cocaine use, 50-year-old man with chest pain, 325(2):70–74
Cognitive impairment, etiology and management of delirium, 325(1): 20–30
Colon cancer, role of DNA testing in, 325(3):120–124
Computed tomography
abdominal computed tomography prolongs length of stay and is frequently unnecessary in evaluation of acute pancreatitis, 325(5);251–255
adenoviral bronchopneumonia in an immunocompetent adult, 325(5):285–287
Congestive heart failure, in patients with chronic kidney disease and on dialysis, 325(4):179–193
Corticosteroids, glucocorticoid-induced osteoporosis in patients with sarcoidosis, 325(1):1–6
Crohn disease, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Cryoglobulinemia, extrahepatic manifestations of hepatitis C infection, 325(3):135–148
Crystal nephropathy, drug-induced renal failure: update on new medications and unique mechanisms of nephrotoxicity, 325(6):349–362

Delirium, etiology and management of, 325(1):20–30
Diabetes mellitus
potential role of increased iron stores in, 325(6):332–339
risk factors for coronary artery disease in patients with renal failure, 325(4):209–213
type 2, beneficial effects of glyburide/metformin combination preparation in, 325(2):66–69
Diagnosis
Churg-Strauss syndrome: diagnostic difficulties and pathogenesis, 325(2):101–105
50-year-old man with chest pain, 325(2): 70–74
Kikuchi disease presenting as flu-like illness with rash and lymphadenopathy, 325(1):34–37
role of DNA testing in breast, ovarian, and colon cancers, 325(3):120–124
and therapy of coronary artery disease in renal failure, end-stage renal disease, and renal transplant populations, 325(4):214–227
Dialysis
cardiac performance and morphology in end-stage renal disease, 325(4): 168–178
congestive heart failure in patients with chronic kidney disease and on dialysis, 325(4):179–193
hypertension in chronic dialysis patients, 325(4):194–201
midodrine improves chronic hypotension in hemodialysis patients, 325(5):256–261
pericardial involvement in end-stage renal disease, 325(4):228–236
vascular and cardiac infections in end-stage renal disease, 325(4):243–250
Diet, chronic licorice ingestion as unusual cause of hypokalemic paralysis, 325(3):153–156
Disseminated intravascular coagulation, heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1): 45–47
DNA testing, role in breast, ovarian, and colon cancers, 325(3):120–124
Dyslipidemia
lipid abnormalities and renal disease: is dyslipidemia a predictor of progression of renal disease?, 325(6):340–348
risk factors for coronary artery disease in patients with renal failure, 325(4):209–213

Electrolyte disturbances
pericardial tamponade-associated hyponatremia, 325(1):51–52
thyrotropin-secreting pituitary adenoma presenting as hypokalemic periodic paralysis, 325(1):48–50
Endocarditis
right-sided endocarditis complicating an atrial septal defect, 325(5):282–284
vascular and cardiac infections in end-stage renal disease, 325(4):243–250
Environmental health, clinical implications of mycotoxins and *Stachybotrys,* 325(5):262–274
Epidemiology
from 1960s Evans County Georgia to present-day Jackson, Mississippi: exploration of the evolution of cardiovascular disease in African Americans, 325(6):307–314
traditional and nontraditional risk factors for cardiovascular and renal disease in African Americans (part 2), 325(6):305–306
Etanercept, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Exercise, isometric exercise increases the size of forearm veins in patients with chronic renal failure, 325(3): 115–119

Familial Mediterranean fever, acute vasculitis with multiorgan involvement in, 325(6):363–364
Flexner report, loss of laboratory instruction in American medical schools, 325(1):10–14
Fungi, clinical implications of mycotoxins and *Stachybotrys,* 325(5):262–274

Genetic disorders
Hemochromatosis and Iron Overload Screening Study design for evaluation of 100,000 primary care-based adults, 325(2):53–62
orthostatic intolerance is not necessarily related to a specific mutation in the human norepinephrine transporter gene, 325(2):63–65
role of DNA testing in breast, ovarian, and colon cancers, 325(3):120–124
Geriatric patients
etiology and management of delirium, 325(1):20–30
process of care and outcomes in peripheral arterial disease, 325(3):125–134
Glucose control, beneficial effects of glyburide/metformin combination preparation in type 2 diabetes mellitus, 325(2):66–69
Glyburide/metformin, beneficial effects in type 2 diabetes mellitus, 325(2): 66–69
Goodpasture syndrome, granulocyte and monocyte adsorption apheresis in a patient with antiglomerular basement membrane glomerulonephritis and active ulcerative colitis, 325(5):296–298
Graft versus host disease, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92

Hematology, polycythemia vera responds to imatinib mesylate, 325(3): 149–152
Hemobilia, metastatic melanoma presenting as cardiac mass and, 325(3): 157–159
Hemoptysis, caused by endobronchial schwannoma in a patient with neurofibromatosis 2, 325(5):299–302
Heparin, heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1):45–47
Hepatitis
associated with amoxicillin/clavulanic acid and/or ciprofloxacin, 325(1): 31–33
extrahepatic manifestations of hepatitis C infection, 325(3):135–148
Hyperaldosteronism, patient with sodium- and potassium-losing nephropathy, 325(2):93–97
Hypertension
after kidney transplantation, 325(4): 202–208
cardiac performance and morphology in end-stage renal disease, 325(4): 168–178

in chronic dialysis patients, 325(4):194–201
chronic licorice ingestion as unusual cause of hypokalemic paralysis, 325(3):153–156
risk factors for coronary artery disease in patients with renal failure, 325(4):209–213
Hyperthyroidism, thyrotropin-secreting pituitary adenoma presenting as hypokalemic periodic paralysis, 325(1):48–50
Hypokalemic paralysis
chronic licorice ingestion as unusual cause of, 325(3):153–156
thyrotropin-secreting pituitary adenoma presenting as hypokalemic periodic paralysis, 325(1):48–50
Hyponatremia
pericardial tamponade-associated, 325(1):51–52
syndrome of inappropriate secretion of antidiuretic hormone and nonpalpable purpura in a woman with *Strongyloides stercoralis* hyperinfection, 325(5):288–291
Hypotension, midodrine improves chronic hypotension in hemodialysis patients, 325(5):256–261

Imatinib mesylate, response of polycythemia vera to, 325(3):149–152
Immunoglobulins, monoclonal gammopathy and spurious hypophosphatemia, 325(2):98–100
Infection
adenoviral bronchopneumonia in an immunocompetent adult, 325(5):285–287
clinical implications of mycotoxins and *Stachybotrys,* 325(5):262–274
evaluation and treatment of acute bronchitis at an academic teaching clinic, 325(1):7–9 (erratum, 325(5):303)
extrahepatic manifestations of hepatitis C infection, 325(3):135–148
right-sided endocarditis complicating an atrial septal defect, 325(5):282–284
syndrome of inappropriate secretion of antidiuretic hormone and nonpalpable purpura in a woman with *Strongyloides stercoralis* hyperinfection, 325(5):288–291
thrombosis and infection: case of transient anti-cardiolipin antibody associated with pylephlebitis, 325(6):365–368
vascular and cardiac infections in end-stage renal disease, 325(4):243–250
Inflammation, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Infliximab, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Iron status
Hemochromatosis and Iron Overload Screening Study design for evaluation of 100,000 primary care-based adults, 325(2):53–62
potential role of increased iron stores in diabetes, 325(6):332–339

Jackson Heart Study
lipid abnormalities and renal disease: is dyslipidemia a predictor of progression of renal disease?, 325(6):340–348
racism and cardiovascular disease in African Americans, 325(6):315–331
from 1960s Evans County Georgia to present-day Jackson, Mississippi: exploration of the evolution of cardiovascular disease in African Americans, 325(6):307–314
traditional and nontraditional risk factors for cardiovascular and renal disease in African Americans (part 2), 325(6):305–306

Kidney transplantation
diagnosis and therapy of coronary artery disease in renal failure, end-stage renal disease, and renal transplant populations, 325(4):214–227
hypertension after, 325(4):202–208
vascular and cardiac infections in end-stage renal disease, 325(4):243–250
Kikuchi disease, presenting as flu-like illness with rash and lymphadenopathy, 325(1):34–37

Laboratory instruction, loss of, in American medical schools, 325(1):10–14
Left ventricular hypertrophy
cardiac performance and morphology in end-stage renal disease, 325(4):168–178
cardiovascular mortality in end-stage renal disease, 325(4):163–167
Liver disease
extrahepatic manifestations of hepatitis C infection, 325(3):135–148
hepatitis associated with amoxicillin/clavulanic acid and/or ciprofloxacin, 325(1):31–33
terbinafine-associated hepatotoxicity, 325(5):292–295
Lung disease
adenoviral bronchopneumonia in an immunocompetent adult, 325(5):285–287
evaluation and treatment of acute bronchitis at an academic teaching clinic, 325(1):7–9 (erratum, 325(5):303)
Takayasu arteritis presenting as pulmonary-renal syndrome, 325(5):275–281
Lung tumor
massive hemoptysis caused by endobronchial schwannoma in a patient with neurofibromatosis 2, 325(5):299–302
pericardial tamponade-associated hyponatremia, 325(1):51–52
Lymphadenitis, Kikuchi disease presenting as flu-like illness with rash and lymphadenopathy, 325(1):34–37
Lymphoma, extrahepatic manifestations of hepatitis C infection, 325(3):135–148

Medical education, loss of laboratory instruction in American medical schools, 325(1):10–14
Medications
beneficial effects of glyburide/metformin combination preparation in type 2 diabetes mellitus, 325(2):66–69
drug-induced renal failure: update on new medications and unique mechanisms of nephrotoxicity, 325(6):349–362
evaluation and treatment of acute bronchitis at an academic teaching clinic, 325(1):7–9 (erratum, 325(5):303)
glucocorticoid-induced osteoporosis in patients with sarcoidosis, 325(1):1–6
heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1):45–47
hepatitis associated with amoxicillin/clavulanic acid and/or ciprofloxacin, 325(1):31–33
midodrine improves chronic hypotension in hemodialysis patients, 325(5):256–261
polycythemia vera responds to imatinib mesylate, 325(3):149–152
terbinafine-associated hepatotoxicity, 325(5):292–295
Melanoma, metastatic melanoma presenting as cardiac mass and hemobilia, 325(3):157–159
Metabolic alkalosis, chronic licorice ingestion as unusual cause of hypokalemic paralysis, 325(3):153–156
Midodrine, chronic hypotension in hemodialysis patients improved by, 325(5):256–261
Mitral valve, valvular and perivalvular abnormalities in end-stage renal disease, 325(4):237–242
Mold, clinical implications of mycotoxins and *Stachybotrys,* 325(5):262–274
Monoclonal gammopathy, spurious hypophosphatemia and, 325(2):98–100
Mortality, cardiovascular, in end-stage renal disease, 325(4):163–167
Myelodysplastic syndromes, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92

Neoplasia
metastatic melanoma presenting as cardiac mass and hemobilia, 325(3):157–159
role of DNA testing in breast, ovarian, and colon cancers, 325(3):120–124

spontaneous tumor lysis syndrome in solid tumors, 325(1):38–40
thyrotropin-secreting pituitary adenoma presenting as hypokalemic periodic paralysis, 325(1):48–50
Neurofibromatosis 2, massive hemoptysis caused by endobronchial schwannoma in a patient with, 325(5):299–302
Norepinephrine transporter gene, orthostatic intolerance is not necessarily related to a specific mutation in, 325(2):63–65

Orthostatic intolerance, not necessarily related to a specific mutation in the human norepinephrine transporter gene, 325(2):63–65
Osteoporosis, glucocorticoid-induced, in patients with sarcoidosis, 325(1):1–6
Outcome
long-term outcomes in patients with sickle cell disease and frequent vaso-occlusive crises, 325(3):107–109
process of care and outcomes in peripheral arterial disease, 325(3):125–134
Ovarian cancer, role of DNA testing in, 325(3):120–124
Oxidative stress, antioxidant vitamins and coronary heart disease: part II. randomized clinical trials, 325(1):15–19

Pancreatitis, abdominal computed tomography prolongs length of stay and is frequently unnecessary in evaluation of acute pancreatitis, 325(5);251–255
Parasitic infection, syndrome of inappropriate secretion of antidiuretic hormone and nonpalpable purpura in a woman with *Strongyloides stercoralis* hyperinfection, 325(5):288–291
Pediatric patients, glomerular and tubular dysfunction in children with congenital cyanotic heart disease: effect of palliative surgery, 325(3):110–114
Pericardium
involvement in end-stage renal disease, 325(4):228–236
pericardial tamponade-associated hyponatremia, 325(1):51–52
Peripheral arterial disease, process of care and outcomes in, 325(3):125–134
Phosphate, monoclonal gammopathy and spurious hypophosphatemia, 325(2):98–100
Physicians, loss of laboratory instruction in American medical schools, 325(1):10–14
Pituitary adenoma, thyrotropin-secreting, presenting as hypokalemic periodic paralysis, 325(1):48–50
Pneumonia, adenoviral bronchopneumonia in an immunocompetent adult, 325(5):285–287
Polycythemia vera, response to imatinib mesylate, 325(3):149–152
Porphyria, extrahepatic manifestations of hepatitis C infection, 325(3):135–148
Potassium, patient with sodium- and potassium-losing nephropathy, 325(2):93–97
Primary care, Hemochromatosis and Iron Overload Screening Study design for evaluation of 100,000 primary care-based adults, 325(2):53–62
Psoriasis, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Psychiatry, etiology and management of delirium, 325(1):20–30
Pulmonary embolism, heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1):45–47
Pulmonary hemorrhage, acute vasculitis with multiorgan involvement in patient with familial Mediterranean fever, 325(6):363–364
Purpura, syndrome of inappropriate secretion of antidiuretic hormone and nonpalpable purpura in a woman with *Strongyloides stercoralis* hyperinfection, 325(5):288–291
Pylephlebitis, thrombosis and infection: case of transient anti-cardiolipin antibody associated with, 325(6):365–368

Renal function and disease
cardiac performance and morphology in end-stage renal disease, 325(4):168–178
cardiovascular complications of end-stage renal disease: overview, 325(4):161–162
cardiovascular mortality in end-stage renal disease, 325(4):163–167
congestive heart failure in patients with chronic kidney disease and on dialysis, 325(4):179–193
diagnosis and therapy of coronary artery disease in renal failure, end-stage renal disease, and renal transplant populations, 325(4):214–227
drug-induced renal failure: update on new medications and unique mechanisms of nephrotoxicity, 325(6):349–362
glomerular and tubular dysfunction in children with congenital cyanotic heart disease: effect of palliative surgery, 325(3):110–114
granulocyte and monocyte adsorption apheresis in a patient with antiglomerular basement membrane glomerulonephritis and active ulcerative colitis, 325(5):296–298
hypertension after kidney transplantation, 325(4):202–208
hypertension in chronic dialysis patients, 325(4):194–201
isometric exercise increases the size of forearm veins in patients with chronic renal failure, 325(3):115–119
lipid abnormalities and renal disease: is dyslipidemia a predictor of progression of renal disease?, 325(6):340–348
patient with sodium- and potassium-losing nephropathy, 325(2):93–97
pericardial involvement in end-stage renal disease, 325(4):228–236
risk factors for coronary artery disease in patients with renal failure, 325(4):209–213
Takayasu arteritis presenting as pulmonary-renal syndrome, 325(5):275–281
traditional and nontraditional risk factors for cardiovascular and renal disease in African Americans (part 2), 325(6):305–306
valvular and perivalvular abnormalities in end-stage renal disease, 325(4):237–242
vascular and cardiac infections in end-stage renal disease, 325(4):243–250
Rheumatoid arthritis
Churg-Strauss syndrome: diagnostic difficulties and pathogenesis, 325(2):101–105
new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Risk factors
for coronary artery disease in patients with renal failure, 325(4):209–213
lipid abnormalities and renal disease: is dyslipidemia a predictor of progression of renal disease?, 325(6):340–348
potential role of increased iron stores in diabetes, 325(6):332–339
racism and cardiovascular disease in African Americans, 325(6):315–331
traditional and nontraditional risk factors for cardiovascular and renal disease in African Americans (part 2), 325(6):305–306

SAPS II, abdominal computed tomography prolongs length of stay and is frequently unnecessary in evaluation of acute pancreatitis, 325(5);251–255
Sarcoidosis, glucocorticoid-induced osteoporosis in patients with, 325(1):1–6
Schwannoma, massive hemoptysis caused by endobronchial schwannoma in a patient with neurofibromatosis 2, 325(5):299–302
Screening, Hemochromatosis and Iron Overload Screening Study design for evaluation of 100,000 primary care-based adults, 325(2):53–62

Sepsis, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Sickle cell disease, long-term outcomes in patients with frequent vaso-occlusive crises, 325(3):107–109
Sodium, patient with sodium- and potassium-losing nephropathy, 325(2):93–97
Southwestern Internal Medicine Conference
clinical implications of mycotoxins and *Stachybotrys,* 325(5):262–274
etiology and management of delirium, 325(1):20–30
extrahepatic manifestations of hepatitis C infection, 325(3):135–148
new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
Stachybotrys, clinical implications of mycotoxins and, 325(5):262–274
Still disease, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92
***Strongyloides stercoralis* hyperinfection,** syndrome of inappropriate secretion of antidiuretic hormone and nonpalpable purpura in woman with, 325(5):288–291
Surgery, glomerular and tubular dysfunction in children with congenital cyanotic heart disease: effect of palliative surgery, 325(3):110–114
Syndrome of inappropriate secretion of antidiuretic hormone, and nonpalpable purpura in a woman with *Strongyloides stercoralis* hyperinfection, 325(5):288–291

Takayasu arteritis, presenting as pulmonary-renal syndrome, 325(5):275–281
Terbinafine, hepatotoxicity of, 325(5):292–295
Terminally ill patients, etiology and management of delirium, 325(1):20–30
Thromboembolic disorders
heparin-induced thrombocytopenia with pulmonary embolism and disseminated intravascular coagulation associated with low-molecular-weight heparin, 325(1):45–47
primary antiphospholipid syndrome associated with acute adrenal failure, 325(1):41–44
thrombosis and infection: case of transient anti-cardiolipin antibody associated with pylephlebitis, 325(6):365–368
Tumor lysis syndrome, spontaneous, in solid tumors, 325(1):38–40
Tumor necrosis factor-α (TNFα) blockers, new indications for treatment of chronic inflammation by, 325(2):75–92

Ulcerative colitis, granulocyte and monocyte adsorption apheresis in a patient with antiglomerular basement membrane glomerulonephritis and, 325(5):296–298
Uveitis, new indications for treatment of chronic inflammation by TNF-α blockade, 325(2):75–92

Vasculature
isometric exercise increases the size of forearm veins in patients with chronic renal failure, 325(3):115–119
process of care and outcomes in peripheral arterial disease, 325(3):125–134
Takayasu arteritis presenting as pulmonary-renal syndrome, 325(5):275–281
Vasculitis
acute vasculitis with multiorgan involvement in patient with familial Mediterranean fever, 325(6):363–364
Churg-Strauss syndrome: diagnostic difficulties and pathogenesis, 325(2):101–105
Vaso-occlusive crises, frequent, long-term outcomes in patients with sickle cell disease and, 325(3):107–109
Viral infection
adenoviral bronchopneumonia in an immunocompetent adult, 325(5):285–287
extrahepatic manifestations of hepatitis C infection, 325(3):135–148
Vitamin D, glucocorticoid-induced osteoporosis in patients with sarcoidosis, 325(1):1–6
